6. Include every student in export >>> See above.

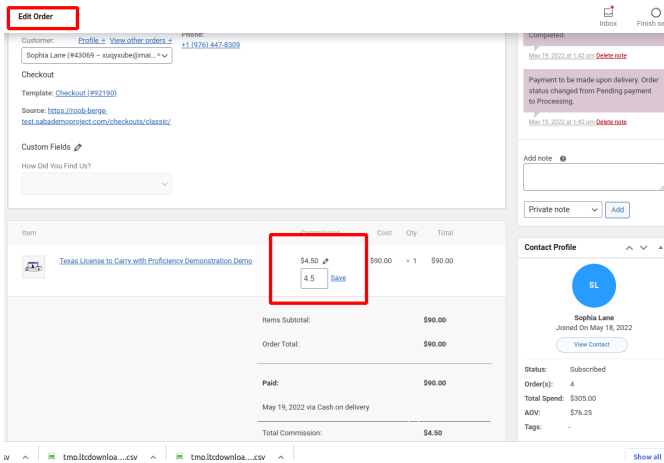

7. View and edit business data and information including (order) commissions

8. View and edit orders/purchases

>>> That's just Woo's default order page for super admin.

9. Edit orders and commissions after orders have been completed

10. Change which product was ordered and Process commissions based on the change of the product

>>> **** Feature not working**

11. Hide/encrypt bank information for businesses

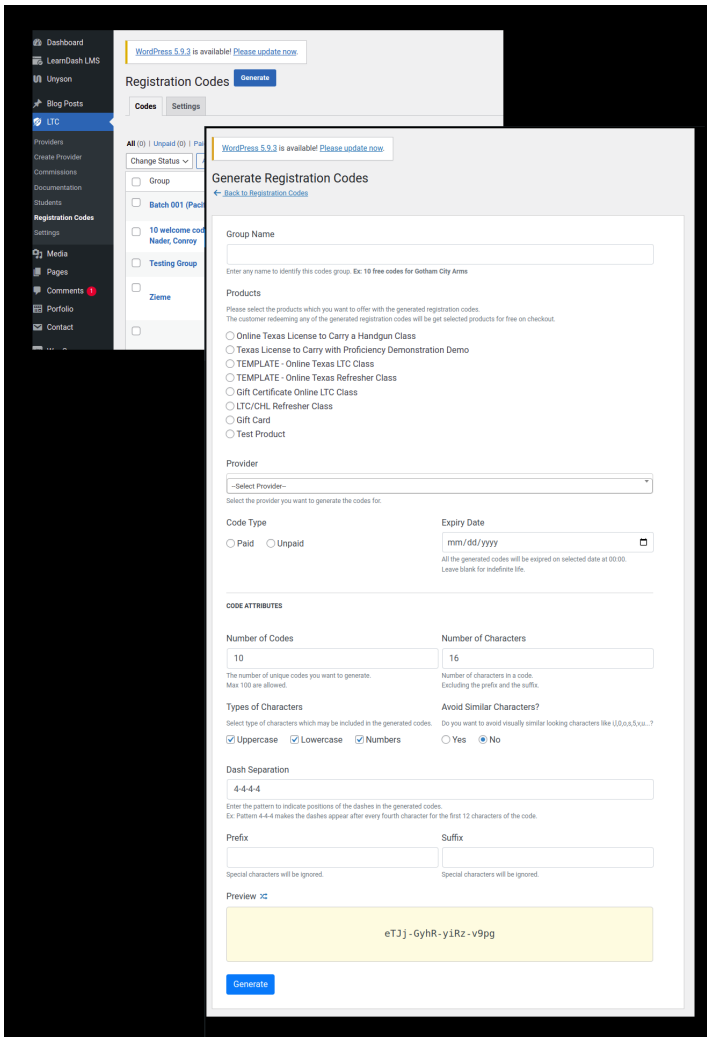

12. Ability to assign a customer to a different business

(Doing this would allow that business to view that customers class information)

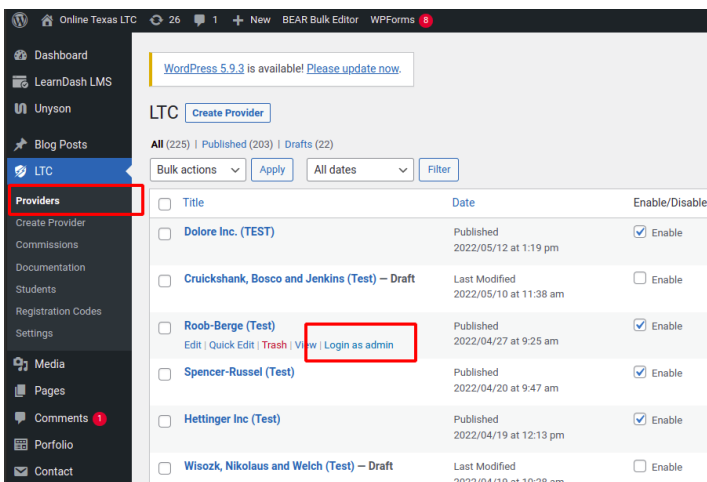

13. Automatic website backups to Microsoft OneDrive

>>> Instead of Microsoft OneDrive, we use Acronis Off-premises backup service which secures all files and databases, we'll activate it when we buy a new server for the new system at the time of go-live.

14. Manually create registration codes for businesses

15. User Switching: administrators need the ability to switch between (login as) user accounts (provider admin and a student) for troubleshooting/testing purposes.
View the site exactly how that particular user would
This is possible in the current site with the Uncanny Toolkit plugin and works very well

WordPress 5.9.3 is available! [Please update now](#)
